**RETINUES 2.0**  
FORGE OF WAR  
DEVELOPMENT GROUP

# FOREWORD

After the success of the First Edition of these rules we received new Retinue submissions from several gamers. This increased the overall number of retinues to a level where the rules book would have become an unwieldy volume. So the decision was made to split the rules into three volumes; the Core Rules; the Campaign Rules, and; the Retinues.

This book now includes all the Retinues from the original Appendix 1 of the Rules, as well as more that were submitted after they were written.

All example retinues are based on around 200 points.

## Figure Costs

In this game we use a WYSIWYG process for looking at a figure. So if a figure has a Lasipistol and a sword then you count both.

Figure cost = Grit[See below] + FV + SV + Speed + Armour + Weapon[s] + Special Abilities/Powers.

Count the cost of every weapon listed for the figure [weapons costs are in section 5.0 of the Core Rules]. The cost of grenades [3pts] is added only once.

If a figure throws a weapon and there is only one such weapon on the figure [WYSIWYG], then that weapon is gone. Guns of various types all come with enough ammunition/energy to last the skirmish.

### 2.2 The cost of Grit

Grit is the most significant characteristic in combat as it determines the chance of surviving a hit. The table below show the cost of Grit:

Grit	Points Cost
6+	1
5+	2
4+	4
3+	9
2+	16

# THE FORCES OF THE IMPERIUM

## THE ADEPTUS ASTARTES BY CRAIG CARTMELL

There is a long history of rivalry and 'misunderstandings' between certain Inquisitors and Chapters of the Adeptus Astartes. Both organizations believe that they report only to the Emperor and work in his name. Space Wolves, Dark Angels and Relictors are perfect examples of this.

The following is a list for someone who wishes to represent just such a situation. It should be noted that the Space Marines listed here and in the Inquisition list above are all veterans. Thus they can deploy in Terminator Armour if the Retinue can afford it.

Type	Grit	FV	SV	Speed	Notes
Captain	2+	+4	+4	+1	Leader. Terrifying [5pts]
Librarian	2+	+4	+3	+1	Leader. May have Psyker powers @ 10pts each

 2 Cyber Mastiffs Mastiff Armour & Bite @ 29 pts.

## THE ECCLESIARCHY BY CRAIG CARTMELL

It is not unusual for a Bishop to take matters into his own hands when faced with heresy or chaos. The Ecclesiarchy has no particular love for the Inquisition, nor its interfering agents. After all it has its own faithful servants that it can call upon.

A Bishop can call upon the Sisters of Battle to aid him. If so they must be led by a Canoness who may choose to have Sisters, Seraphim and/or Penitents.

Type	Grit	FV	SV	Speed	Notes
Bishop	4+	+3	+0	+0	Leader. Invokes Faith [5pts], Immune to Psyker attacks [5pts]
Canoness	2+	+3	+3	+1	Leader.

Some specialist reconnaissance units have access to cameleoline cloaks. If in cover, troops with these items get +1 on top of the normal cover bonus. This costs 2 pts per figure. A figure with a cloak will not also be in carapace armour.

## ORDO-BASED INQUISITOR RETINUES BY CRAIG CARTMELL

### Ordo Xenos – The Alien Hunters

This Ordo seeks out and eliminates alien threats to the Imperium. They have access to the elite Space Marines of the Deathwatch.

An Ordo Xenos Retinue must be led by an Inquisitor, except where the Retinue is a Deathwatch Kill-team, when it is led by a Deathwatch Sergeant.

### Inquisitorial Agents

Inquisitors can also avail themselves of any of a number of different specialists. These represent those character we find in the various Inquisitor novels such as Harlon Nayl and Kara Swole.

Note that Inquisitorial Agents cannot be taken as 'Strange Allies' by non-Inquisitorial Retinues.

#### Inquisitorial Agent: Untouchables [By Scott R. Pyle]

Although never mentioned in the various Codices, these do feature strongly in both the Eisenhower and Ravenor stories. So for any Inquisition Retinue a player may choose to add one of these useful agents.

Type	Grit	FV	SV	Speed	Notes
Untouchable	4+	+1	+1	+0	Untouchable ability, see below.

Base Cost: 11 pts.

**Notes:** The basic version of this ability costs +5 pts. [already factored into the model's cost above]. Untouchables act as psychic nullifiers, completely immune to the effects of Psyker powers [both harmful and helpful], while also conferring this immunity to any model in base contact with them.

For +10 pts., the Untouchable's nullifying aura extends to a 3" radius from its base. The Untouchable may also re-roll any failed Grit checks from the Terrifying influence of Daemons.

The Untouchable's psychic blankness makes him an uneasy ally. Untouchables may never take part in Gang Ups in close combat.

They may be outfitted with equipment appropriate to the Inquisitorial list. The cost of any equipment must be added to the model's base cost.

#### Inquisitorial Agent: Grizzled Veteran

Base Cost: 10 pts.

Notes: Inquisitors often surround themselves with dead-hard fighters from the far corners of the Imperium. Whether these men or women were once in the Imperial Guard, or worked as bounty hunters or hired muscle, they now have chosen to dedicate their lives to their Inquisitor to fight and die in the Emperor's name.

A Grizzled Veteran agent possesses the following basic profile:

Type	Grit	FV	SV	Speed	Notes
Grizzled Veteran	4+	+1	+1	+1	Specialist Options, see below.

When purchased, the player may split 4 additional points between the model's FV, SV, and Speed, but must add at least +1 to its FV and SV from this pool. This 4 pts. has already been factored into the model's base cost.

#### Specialist Options

- Grit Bonus: For +5 pts. the model gets Grit 3+ instead of 4+

- **Nose for Trouble:** For +5 pts. the Grizzled Veteran adds +1 to the Leader's initiative rolls each round. This bonus does not count if the Grizzled Vet gets removed from play. A leader may only ever gain a +1 bonus from models possessing this trait, so multiple models with it do not stack. Too much advice can often be a bad thing!
- **Bionics:** For +5 pts., the model may add Bionics to its profile, gaining +1 to Armor and +1 to FV.

He may be outfitted with equipment appropriate to the Inquisitorial list. The cost of any equipment must be added to the model's base cost

### **Inquisitorial Agent: Sage**

Base Cost: 10 pts.

Notes: Sometimes serving the Emperor requires more than a well-aimed lasgun shot or a deft knife thrust; it requires knowledge. Sages aid their Inquisitorial masters by providing knowledge in key situations. If pressed they will fight, but combat is a secondary role for them.

A Sage agent possesses the following basic profile:

Type	Grit	FV	SV	Speed	Notes
Sage	4+	+1	+1	+0	Specialist Options, see below.

### **Specialist Options**

Players should select at least one of the following options for their sage models, adding their cost to the model's base cost. Each option costs +5 pts.

- **Analyze:** +2 to objective rolls on Investigative and Survival missions for a Friendly model in base contact.
- **Daemon Lore:** Any friendly model within 3" of the Sage gains +1 FV and +1 SV against Daemonic targets.
- **Bionics:** The model may add Bionics to its profile, gaining +1 to Armor and +1 to FV.

He may be outfitted with equipment appropriate to the Inquisitorial list. The cost of any equipment must be added to the model's base cost.

### **Inquisitorial Agent: Generic**

Base Cost: 5 pts.

Notes: An Inquisitor has men and women on his payroll that defy normal classification. This Agent is there to allow you to customize them to your own ideas. If you have read the Black Library Inquisitor Novels you know exactly what we mean.

A Generic Agent possesses the following basic profile:

Type	Grit	FV	SV	Speed	Notes
Generic Agent	4+	+1	+1	+0	Options, see below.

### **Options**

- **Special Abilities;** A Generic Agent can choose up to three special abilities from section 9.0 of the Core Rules. Pay the listed cost for these.
- For 5pts he can add three points to his FV, SV and/or Speed. No more than 2 points can be added to any single one of these.
- He can have up to two Psyker Powers at 10pts each.

He may be outfitted with equipment appropriate to the Inquisitorial list. The cost of any equipment must be added to the model's base cost

### **Servo Skulls [By Scott R. Pyle]**

Base Cost: 9 pts.

Made from cyber-technology encased within the skull of a departed servant of the Emperor, a Servo Skull exists to serve its master, usually an Inquisitor or Interrogator. Servo Skulls do not attack in close or ranged combat, but they can defend themselves in melee.

Type	Grit	FV	SV	Speed	Notes
Servo Skull	5+	+0	+0	+1	Armour 6+

## Notes

Floater: The Servo Skull floats on an anti-grav field and thus ignores difficult terrain. It may also move over gaps that would normally cause a model to fall.

In addition, a player may select two of the following abilities for the Servo Skull, adding the costs to the model's base cost.

- Melee Combat Assist [+2 pts]: +1 FV to a Friendly model in base contact.
- Ranged Combat Assist [+2 pts]: +1 SV to a Friendly model in base contact.
- Stimm Injection [+2 pts]: +1 to Grit roll for a Friendly, knocked down model in base contact.
- Analyze [+2 pts]: +1 to an objective rolls on Investigative missions for a Friendly model in base contact.

## IMPERIAL NAVY LANDING PARTY

In the space between the worlds that make up the Imperium, the Imperial Navy is often the first to encounter hostile alien threats or Chaos incursions into human space. They are also often the first to be called to investigate planetside trouble or search out the mysteries of sinister space hulks that drift into human shipping lanes from the Immaterium. Imperial Naval personnel can never be certain what dangers they will face.

Type	Grit	FV	SV	Speed	Notes
Master of the Fleet	3+	+3	+3	+1	Leader.
Naval Officer	4+	+2	+3	+1	Leader.
Mate*	4+	+2	+2	+0	Old Salt: Crewman/armsmen within 6" get +1 to Grit rolls [5pts].

## ROGUE TRADER BY JASON MASTROS

Rogue Traders travel beyond the bounds of Imperial space to discover, explore, loot, and conquer in the name of the Emperor. Most have a comfort level with alien cultures and technology that many Imperial citizens would consider heretical. In consequence, the Rogue Trader's companions are as likely to be from the fringes of humanity as they are from alien societies.

Type	Grit	FV	SV	Speed	Notes
Rogue Trader	3+	+4	+3	+1	Leader. May carry Jokaero digital weapons and refractor shield. May also have a Servo Skull.
Astropath	5+	0	0	-3	May have Psyker powers @ 10 points each. Blind. Can only move at normal speed if carried by another figure who cannot fight that turn.
Space Marine	3+	3+	3+	1+	Leader. On detachment from his Chapter, and may only be fielded one per retinue. Cannot be fielded if there are Xenos in the Retinue.
Mercenary	4+	+2	+2	+0	
Crewman	5+	+1	+1	+0	
Assassin	4+	+4	+3	+1	May wield sniper rifle OR power sword.
Xenos Merc	*	*	*	*	May be Kroot warrior, Tau Fire Warrior, or Ork Boy with allowable basic weapons, armor, and skills from the appropriate roster[see respective retinue lists].

### Xenos Mercs

Rogue Traders will often hire the services of alien fighters and specialists to serve in their crews. Such behaviour is an intolerable heresy to many Inquisitors, and as a result can lead to conflict between the groups. The only aliens that can be hired are the Kroot Warrior, the Tau Fire Warrior, and the Ork Boy. Each may purchase the standard weapons from their original retinue and armour lists, or they may be equipped from the human arsenal.

Armor	Notes	Restricted to:
None	Just clothing [5+ to hit].	
Light	Flak Jacket or Mesh [6+ to hit].	
Medium	Carapace Armour [7+ to hit], Refractor Shield [7+ to hit].	Rogue Trader only.
Heavy	Power Armour [8+ to hit].	Space Marine only.

Weapons	Notes	Combat Bonus
Improvised	Tree branches, broken bottle [-1 to hit].	-1
Light	Dagger, Bayonet, Hand axe, Club, Autopistol	0
Medium	Sword, Staff, Autogun, Lasgun, Laspistol,, Shotgun Jokaero Digital Weapons [Rogue Trader only, 12" range]	+1
Heavy	Two-handed Sword, Chainsword, Bolt Pistol, Bolter, Heavy Stubber, Flamethrower	+2 +2
	Heavy Bolter, Hellgun, Plasma Pistol, Power Weapon,	+3

### Jokaero Digital Weapons

The Rogue Trader may purchase up to two Jokaero Digital weapons to use in addition to his own personal ranged weapon, at a cost of 1 point each. The +1 combat bonus from each can also be added to melee combat attacks.

### Example Rogue Trader Retinue – 196 points

Rogue Trader	Refractor Shield, 2 Jokaero Digital Weapons, Chainsword @ 28 pts
Space Marine	Power Armour, Bolter, Chainsword @ 25 pts

## ADEPTUS MECHANICUS QUESTOR PARTY BY JASON MASTROS

The Tech-Priests of the Imperium are not just responsible for maintaining the technology of the Imperium-including its mighty war machines and vast Forge Worlds. They also are charged with seeking out lost and elusive knowledge regarding the Dark Age of Technology as well the technological accomplishments of alien civilizations. As a result, Questor parties representing the Cult of the Machine God have spread out through the galaxy, combing archaeological dig sites, abandoned cities, and captured alien weapon caches for the whisperings of the Ommissiah.

**Electro-Charge:** Once per turn, in place of other attacks, Electro Priests may deliver charged attack to all models within 3" range. All models in range must automatically make Grit rolls, and any model that fails or rolls its Grit value exactly is knocked down. Costs additional five points.

**Bionics:** Most Machine Cult members are cybernetically and bionically enhanced to some degree. As a result, all models marked with "Bionics" in the notes must purchase bionic enhancements. The FV bonus for these has already been included in the model's stats, but be sure to also include the +1 armour bonus for all models not wearing power armour. This costs 5pts per figure.

\*Restricted, see Gang Advantages below.

Each Gang in the Hive has some distinct advantages or disadvantages as show below:

Gang	Advantages & Disadvantages
Cawdor	+1 FV vs. Scavvies and Chaos, as they are members of the Cult of Redemption. Can deploy a Priest
Delaque	+1 SV for all types. Access to Sniper Rifles.
Escher	Speed +2 for all types. Do not have Pit Fighters.
Goliath	+1 FV for all types. A Goliath gunner can carry and use a Heavy Bolter or Stubber without the need for a second crewman.
Orlock	Armour is one level better [i.e. Flak Jackets are 7+ to hit], due to their access to metal workings.
Van Saar	Access to advanced Equipment such as Refractor Shields, Plasma Pistols & Guns, and Sniper Rifles.

Others	Advantages & Disadvantages
The Enforcers	May deploy with Suppression Shields. This increases their armour by one level against ranged attacks. These shields cost 3 points. May also use Shock Mauls. Enforcers must deploy in Carapace Armour.
Pit Slaves	These have bionic augmentations which means the player can pick between having FV+2/SV+0 or FV+0/SV+2.

Ratskins	Scavengers. This means that they can pick up and use the weapons of any figure they kill. They are pretty cowardly though and their Grit is always one step worse than shown above [i.e. a Veteran Scavvies Grit is 5+]. However no Grit can be worse than 6+.
Scavvies	For each figure roll 1D6 and apply the mutations listed below: 1 Brawny: +1 to FV. Reduce SV to 0. 2 Psyker: You can buy one Psyker Power for 5 points. 3 Precog: The figure can reroll one attack it makes per turn. 4 Leprous: Grit is one level better. Reduce Speed to -1. 5 Sharp Eyes: +1 to SV. Reduce FV to 0. 6 Scalie: Replace figure with a Pit Fighter.
Spyre Hunters	Access to advanced Equipment such as Power Armour and Power Weapons.

# THE FORCES OF CHAOS

## THE TRAITOR LEGIONS BY CRAIG CARTMELL

Possibly the most terrifying enemy an Inquisitor may have to face are Chaos Space Marines. These ancient warriors possess knowledge and skills beyond even that of their hated brothers of the Adeptus Astartes. For Renegades use the Adeptus Astartes list and add an Aspiring Champion or Sorcerer.

The following is a list for someone who wishes to represent just such a situation. It should be noted that the Chaos Space Marines listed here are all veterans. Thus they can deploy in Terminator Armour if the Captain can afford it.

Type	Grit	FV	SV	Speed	Notes
Aspiring Champion	2+	+5	+5	+1	Leader.
Sorcerer	2+	+4	+3	+1	Leader. May have Psyker powers @ 10pts each
Chaos Space Marine	2+	+4	+4	+1	
Raptor	2+	+4	+4	+3	Can fly [5pts].
Lesser Daemon	4+	+3	+1	+2	Terrifying to non-Chaos forces [5pts]

Very Heavy	Power Fist, Lightning Claw, Meltagun, Plasmagun, Daemon Weapon	+4

All Chaos Space Marines are immune to Terror [5pts].

Some Legions have special abilities honed over thousands of years. If you wish to use specific Legion Marines they will cost an extra 5 pts per Marine figure [i.e. not Daemons].

In a Chaos Space Marine Retinue you can mix figures from different legions. However, if the Aspiring Champion is of a specific Legion then all other Marines must be from that Legion also.

Legion	Special Abilities
Alpha Legion	Always deploy last and can deploy up to 12" into the board as long as they cannot be seen by the other's player's deployed figures.
Black Legion	A Black Legion Aspiring Champion can have Marines from other Legions in his Retinue.
Death Guard	They ignore the first hit they take each turn.
Emperor's Children	Add +3 to Initiative rolls.
Iron Warriors	All have Bionics.
Night Lords	All are Terrifying.
Thousand Sons	Thousand Sons Bolters are +3. Psyker powers cost 5pts instead of 10.
Word Bearers	Sorcerer or Champion can begin game with Lesser Daemons.
World Eaters	FV is one higher than listed.

The World Eaters have no Sorcerers.

### Example Word Bearers Retinue – 194 pts.

Aspiring Champion                      Power Armour, Bolter, Bolt Pistol & Daemon Weapon @ 54 pts.  
 2 Chaos Space Marines              Power Armour, Bolter, Bolt Pistol & Chainsword @ 47 pts.

## BLOOD PACT DEATH BRIGADE BY CRAIG CARTMELL

The Force of Chaos are often able to call upon the assistance of a Traitorous Guard formations such as the Blood Pact, featured in the Sabbat Worlds novels of Dan Abnett.

The Blood Pact Death Brigades are efficient veteran soldiers that invoke fear and loathing in all Imperial forces. They are dedicated servants of the Chaos God Khorne which is why they are so ferocious.

The Retinue options listed below represent a patrol or perhaps a raiding party.

## THE LOST AND THE DAMNED BY CRAIG CARTMELL

Actions within the Imperium by the Traitor Legions and the Bloodpact are thankfully fairly infrequent. Far more common are chaos-inspired rebellions on planets where the people have been led astray or that have become weary of the demands of the Imperium.

These are often led by cultists or even fallen members of the Ecclesiarchy. These are the forces described as Adversaries in the Witch Hunters Codex.

This list is for when the secret conspiracies of the Chaos Agent have borne fruit and rebellion is inevitable or actually in progress.

## BLOODAXE WAR BAND BY CRAIG CARTMELL

Ambitious and devious Bloodaxe warlords can be found in every corner of the Imperium. Their mercenary and criminal activities often come to the notice of the Inquisition.

Heavy	Big Choppa, Burna, Big Shoota, Flamethrower	+2
Very Heavy	Power Klaw, Kustom Mega Blasta, Rokkit	+4

Like other Psykers the Weirdboy must make a Grit roll to use powers. However, his Grit roll depends on how many Orks are within 12" of him, as he is drawing upon their latent psyker power.

If it is six or more he does not fail, if it is 5 or more he must roll 2+, if it is 4 or more he must roll 3+, and if it is less than 4 he must roll 4+.

If he rolls a natural 1 he must make a further Grit roll. If he fails that his head blows off. Weirdboyz never become possessed by daemons.

### Hard Medicine

On his turn a Painboy can move into base contact with a downed Ork. He then tries to revive it using a near-lethal cocktail of stimulants and a few hefty kicks. He rolls 1D6 and on a 6 the Ork gets up and can act immediately, though he cannot move until his next turn.

### Waagh!

Once per game a Warboss can declare a Waagh! When this happens all Orks get +1 to FV for a turn as long as they engage in melee. It does not affect shooting at all.

## TAU INCURSION TEAM BY CRAIG CARTMELL

The Tau are now actively reconnoitring Imperial space. They are inserting teams on missions even on heavily populated planets and can be a deadly foe in a fire fight.

Type	Grit	FV	SV	Speed	Notes
Fire Warrior Shas'ui	3+	+2	+3	+0	Leader.
Pathfinder Shas'ui	3+	+2	+3	+0	Leader.
Pathfinder	4+	+2	+3	+0	
Fire Warrior	4+	+1	+3	+0

Gun Drone	5+	+0	+3	+2	Flight [5pts]. Pulse Carbine only.
Kroot Shaper	3+	+4	+2	+1	Leader [Kroot only].
Kroot Warrior	4+	+2	+1	+1	
Kroot Hound	5+	+3	-	+2	

Pathfinders are experts at reconnaissance and if in cover get +1 on top of the normal cover bonus. This costs 2 pts per figure.

Stealth Suits are designed to be difficult to target. Against ranged fire in the open they are counted as being in soft cover, and in cover they get +2 on top of the normal cover bonus. This costs 3 pts per figure.

Stealth Suits have jet packs which allow them to move and ignore intervening terrain. But they must end their movement on the ground. This costs 5 pts per figure.

Gun Drones can fly over terrain but remain within 2m of the ground, so can be assaulted.

Type	Notes	Restricted to:
Light	Kroot [6+ to hit].	
Medium	Fire Warrior Armour [7+ to hit], Gun Drone Armour [7+ to hit].	Tau
Heavy	Stealth Suit [8+ to hit].	

Type	Notes	Combat Bonus

Heavy	Burst Cannon [18" Range] Stealth Suits only. Rail Rifle [36" range] Pathfinders only. No more than one per Retinue.	+2 +3

1. A Kroot Rifle give +1 in Melee as well because of the blades on the muzzle and stock.

2. Photon Grenades do not cause damage but visual distortion. Enemies hit with these have a penalty of -1 to FV & SV for the next turn.

### Example Tau Team – 205 pts.

Shas'ui Fire Warrior Armour, Pulse Carbine & Pulse Pistol, Photon Grenade @ 25 pts.

6 Fire Warriors Fire Warrior Armour, Pulse Rifle, Photon Grenade @ 19 pts.

## SQUAT BROTHERHOOD BY MIKE RYBAK

In a bygone era, the Squats were allies and trading partners of the Imperium. However, when the Tyrannid Hive fleet appeared in Squat space, Humanity cut all ties and left them to their fate. The few lonely survivors of the once proud Squat civilization will never forget nor forgive the Imperium's betrayal.

Type	Grit	FV	SV	Speed	Notes
Warlord	2+	+4	+4	+0	Leader.
Hearthguard	2+	+3	+3	+0	Leader.
Ancestor Lord	2+	+5	+4	+0	May have Psyker powers @ 10pts each.

Squat Warrior	3+	+2	+2	+0	
Squat Adventurer/ Mercenary	3+	+2	+1	+0	
Ratling Adventurer	5+	+1	+3	+0	May be armed with a Sniper Rifle.

**Repair:** A Squat Engineer may move into contact with a damaged device or vehicle and attempt to repair it. If he passes a Grit roll, the device is repaired. He cannot shoot in that turn, and can only defend in melee.

**Combat Engineer:** An engineer in contact with a heavy weapon adds an additional +1 to the weapon's Combat Bonus. This represents the engineer assisting the gunner in finding weak spots in the enemy's defences. An engineer can also quickly prepare improvised defences. If he spends one turn stationary in cover, he then increases the cover value by +1. A given area cover can never be increased by more than +1, regardless of how long the engineer stays there.

Type	Notes	Restricted to:
None	Just clothing [5+ to hit].	
Light	Flak Jacket [6+ to hit].	
Medium	Carapace Armour [7+ to hit] Refractor Shield [7+ to hit].	Ancestor Lord, Guild Engineer
Heavy	Power Armour [8+ to hit].	Guild Engineer

Type	Notes	Combat Bonus

Light	Knife, Bayonet, Autopistol, Grenade	+0
Medium	Sword, Hand axe, Autogun, Lasgun, Laspistol, Shotgun	+1

	Heavy Bolter*, Plasma Pistol, Power Weapon, Graviton Gun [18" range, Guild Engineer only]	+3
Very Heavy	Plasmagun, Power Fist, Meltagun, Thunder Hammer	+4

\* Squats use anti-gravity suspensor technology to lessen the weight of their heavy weapons. Squat Heavy Stubbers and Heavy Bolters do not require a second crew member.

**Graviton Gun:** Roll to hit as normal. If the shot hits, the target is automatically immobilized [no Grit roll allowed]. The effect lasts for d3 turns. Immobilized models cannot carry out any actions whatsoever. If hit by a shooting or melee attack, they may attempt a Grit roll. Models caught in the effect when the game ends recover automatically.

### Example 1 – Squat Brotherhood Retinue - 207 Pts

Warlord Carapace Armour, Bolt Pistol, Power Weapon @ 39 pts

## ANCIENT SLANN WARBAND BY GREG STOREY

Of all the races in the galaxy the Slann claim to be, and may actually be, the oldest. The days of their bright empire are waning, but they remain amongst the most enigmatic creatures of known space. When they seek to do battle, it is for reasons beyond any human comprehension.

Slann technology is far in advance of that of any other known sentient race, and items that would be considered exotic artefacts among other races are commonplace equipment in Slann Warbands.

Type	Grit	FV	SV	Speed	Notes
Warchief	2+	+4	+3	+0	Leader. <b>Must</b> have Psyker powers @ 10 pts each.
Warleader	3+	+3	+2	+0	Leader. May have Psyker powers @ 10 pts each.
Brave	3+	+2	+1	+0	

### Amphibious

Moving in water terrain [rivers, marshes, etc.] does not cost a Slann any reduction in movement.

### Psykers and Force Weapons

The Slann are a deeply psychic race. Their society is heavily Psyker-oriented and led by powerful Mages. A Slann Warchief **must** buy at least one Psyker power. Furthermore, if a Slann has any Psyker powers it **must** buy a Force Weapon [so a Warchief will always have a Force Weapon].

### Hoverer

The Slann Warchief may buy a personal hoverer. This allows it to fly over terrain, but it must remain within 2m of the ground so can be assaulted. This costs 3 points.

Type	Notes	Restricted to:
Medium	Refractor Shield [7+ to hit]	
Heavy	Displacer Field [8+ to hit] [see below]	

### Displacer Field

The Displacer Field protects its wearer by warping them away from the source of danger. If a Slann with a Displacer Field is hit by one or more attacks in any turn, mark it with a counter. At the end of the turn, the Slann is teleported D6" in a random direction, avoiding any obstacles. This costs 7 points per Slann [one point less than usual for armour 8+, due to the unpredictable results].

Weapons	Notes	Combat bonus
Light	Dagger, Hand Axe, Club, Autopistol, Grenade	+0
Medium	Sword, Bolt Pistol, Autogun, Lasgun, Laspistol	+1
Heavy	Flamethrower, Neuro-Disruptor [12" range, Warchief/Warleader only – see below]	+2
	Plasma Pistol, Power Weapon, Shuriken Catapult [24" range], Graviton Gun [18" range, max. 1 per Warband – see below]	+3
Very Heavy	Power Fist, Plasma Gun, Meltagun, Force Weapon [psykers only]	+4

### Neuro-Disruptor

The Neuro-Disruptor is a crystalline Pistol weapon that disrupts its target's central nervous system. Roll to hit as normal. If the shot hits, there is no Grit roll. The target is automatically 'knocked down', just as though it had rolled exactly its Grit value after taking a hit [5pts].

### Graviton Gun

Up to one Brave per Warband may be equipped with a Graviton Gun. Roll to hit as normal. If the shot hits, the target is automatically immobilized [no Grit roll allowed]. The effect lasts for D3 turns. Immobilized models cannot carry out any actions whatsoever. If hit by a shooting or melee attack, they may attempt a Grit roll. Models caught in the effect when the game ends recover automatically [5pts].

### Example Slann Warband – 189 pts

Warchief Force Weapon, Autopistol, Displacer Field, Hoverer, 2 Psyker Powers @ 58 pts  
 Warleader Force Weapon, Neuro-Disruptor, Displacer Field, 1 Psyker Power @ 40 pts  
 3 Braves Lasgun, Hand Axe, Refractor Shield @ 22 pts

## ELDAR PIRATES BY GREG STOREY

Eldar who turn to piracy often include the worst elements of the race; misfits, lunatics, sadists and the seriously disturbed. They are sometimes accompanied by Zoats, powerful and enigmatic renegades from the Tyranid Hive Fleets.

The ranks and titles of Eldar pirate leaders vary greatly, with examples given below. Many also make claim to aristocratic birthrights, styling themselves as lords or princes of their kind.

Although not directly in the service of Chaos, their amoral behaviour, indiscriminate attacks and terror tactics mean that Eldar pirates often benefit the aims of the Ruinous Powers nonetheless.

Type	Grit	FV	SV	Speed	Notes
Malefactor	2+	+4	+4	+1	Leader. May have psyker powers @ 10 pts each
Prefector	2+	+3	+3	+1	Leader. May have psyker powers @ 10 pts each

### Flight packs/power boards

Any Eldar may purchase a flight pack or power board for 10 points. The effect is the same for either device, granting the wearer or rider Flight and +3 Speed.

### Jokaero Digital Weapons

The Malefactor may purchase up to two Jokaero Digital weapons to use in addition to his own personal ranged weapon, at a cost of 1 point each. The +1 combat bonus from each can also be added to melee combat attacks.

### Barbed Strangler

Any Zoot may be armed with a Barbed Strangler. This costs 5 points and is a Grenade Launcher.

### Mercenaries

The less psychotic of outcasts from the Eldar Craftworlds often find work as mercenaries for the Mon-Keigh. Rogue Trader retinues may include basic Eldar Pirates as Xenos Mercs. Unlike other Xenos Mercs, these must always be equipped with weapons and armour chosen from the Eldar Pirates retinue list, not the Rogue Trader one.

### Example Pirate Crew – 208 pts

Malefactor Power Armour, Shuriken Catapult, 2 Jokaero Digital Weapons @ 51 pts  
 3 Eldar Pirates Power Armour, Shuriken Catapult, Dagger @ 29 pts

## CRAFTWORLD ELДАР BY GREG STOREY

This retinue represents a small expeditionary force from an Eldar Craftworld. The scale of such an undertaking is beneath the personal attention of a Farseer or Autarch, much less the Avatar, and not sufficiently challenging for an Exarch. It will typically be directed by a Warlock.

Craftworld Eldar approach all conflict in a ritualistic fashion, and will bear only the prescribed arms and armour of their current Path. There is therefore much less freedom in the choices for each warrior in this retinue, though there is a wider range of available specialist troops than most.

Type	Grit	FV	SV	Speed	Armour	Weapons, Equipment & Notes
Warlock	3+	+3	+3	+1	8+	Laspistol <b>or</b> Shuriken Pistol, Force Weapon. Leader. May have Psyker powers @ 10 pts each.

Howling Banshee	3+	+3	+3	+2	7+	Laspistol <b>or</b> Shuriken Pistol, Power Sword. Terrifying [5pts].

Wraithguard	2+	+5	+3	+0	10+	Wraithcannon [same as Meltagun].

### Mandiblaste r

Striking Scorpions are equipped with a special helmet-mounted laser weapon known as a Mandiblaste r. If a Striking Scorpion hits an opponent in close combat and the target passes its Grit roll, the Scorpion may immediately roll to hit once more with his FV and a weapon bonus of +1 [+4 total]. If the Scorpion had split his close combat attack and hit multiple opponents, you must choose which one you are targeting with the Mandiblaste r before rolling to hit with it. A Mandiblaste r costs 1 point.

### Swooping Hawk Grenades

Each Swooping Hawk carries a total of 6 Grenades. This costs 3 points.

### Death Spinner

A Death Spinner is treated as a Flamethrower, except that it does not ignore cover and the carrier does not suffer a -1 penalty to his armour value. A Death Spinner costs 2 points.

### Warp Jump Generator

A Warp Jump Generator grants a Warp Spider the effects of Flight. However, as well as being able to move over terrain, the Warp Spider can also pass directly through obstructions, for example to enter a building. Warp Spiders must end their move in clear terrain [e.g. open ground or an interior room of a building] or behind an obstacle – not within area cover [e.g. woods]. This costs 5 points.

### Cameleoline Cloak

If in cover, Scouts get +1 on top of the normal cover bonus. This costs 2 points.

Weapons	Notes	Combat bonus
Medium	Sword, Laspistol, Lasgun, Shuriken Pistol [12" range], Mandiblaste r [Striking Scorpions only]	+1
Heavy	Chainsword, Flamethrower*, Death Spinner [Warp Spiders only], Sniper Rifle [Scouts only]	+2
	Shuriken Catapult [24" range], Power Weapon, Reaper Launcher [36" range, Dark Reapers only]	+3

\* max. 1 Guardian per retinue may be armed with a Flamethrower, Plasma Gun **or** Meltagun

## HARLEQUINS BY GREG STOREY

The Harlequins are a uniquely Eldar social and military institution – a caste of fighters and entertainers who exist beyond conventional Eldar social structure. In battle, they use their acrobatic skills and a range of specialist equipment to devastating effect.

Type	Grit	FV	SV	Speed	Notes
Troupe Master	2+	+4	+3	+2	Leader. Terrifying [5pts].
Shadowseer	3+	+4	+3	+2	May have Psyker powers @ 10 pts each.
Death Jester	3+	+4	+3	+1	
Harlequin	3+	+4	+3	+2	
Solitaire	2+	+5	+3	+2	Maximum 1 per retinue.

### Elite Few

There is no minimum number of models in a Harlequin Troupe.

### Flip Belt

This anti-gravity device enhances Harlequins' already superhuman acrobatic abilities, allowing them to leap around obstacles and enemies with ease. Harlequins never have their movement rate reduced by terrain, and may move through enemy figures without stopping in base-to-base contact. If a Harlequin begins its move in contact with any enemies, it may break away without incurring a free attack. Every member of this retinue must have a flip belt. This costs 8 points per model.

Type	Notes	Restricted to:
Medium	Holo Field [7+ to hit]	

Weapons	Notes	Combat bonus
Light	<i>Creidann</i> Grenade Pack [Shadowseer only, see below],	+0
	Harlequin's Kiss [see below]	+0
Medium	Sword, Laspistol, Shuriken Pistol [12" range]	+1
	Jokaero Digital Weapons [12" range – Solitaire only, see below]	+1
Heavy	Chainsword, Neuro-Disruptor [12" range – Solitaire only, see below]	+2
	Plasma Pistol, Power Weapon	+3
	Shrieker Cannon [24" range – Death Jester only, see below]	+3
Very Heavy	Fusion Pistol [6" range], Power Fist, Force Weapon [Psykers only]	+4

### *Creidann* Grenade Pack

A *Creidann* Grenade Pack is loaded with 6 hallucinogen grenades. It is treated as a Grenade Launcher, except that it may be fired **in addition** to a handheld ranged weapon, and hits **do not** cause Grit rolls. Living creatures hit by it instead treat all enemies as Terrifying for the whole of the following turn. Targets that are not living creatures are completely unaffected. This costs 3 points.

### Harlequin's Kiss

The Harlequin's Kiss is a nozzle-like weapon that, when thrust into a crack in an opponent's armour, projects a thrashing monofilament wire that shreds the target's flesh and bones alike. Any living creature hit by the Harlequin's Kiss automatically fails its Grit test. This costs 5 points.

### Jokaero Digital Weapons

The Solitaire may purchase up to two Jokaero Digital weapons to use in addition to his own personal ranged weapon, at a cost of 1 point each. The +1 combat bonus from each can also be added to melee combat attacks.

### Neuro-Disruptor

The Neuro-Disruptor is a crystalline Pistol weapon that disrupts its target's central nervous system. Roll to hit as normal. If the shot hits, there is no Grit roll. The target is automatically 'knocked down', just as though it had rolled exactly its Grit value after taking a hit.

### Shrieker Cannon

The virulent ammunition of the Shrieker Cannon causes violent reactions in its victims' bodies, resulting in gruesome explosions of flesh. If a living creature is killed by a Shrieker Cannon, every friendly model within 6" must pass a Terror test or retreat D6" directly away from the casualty.

**NECRONS** BY GAVIN BROWN

A race of immortal, undead warriors clad in seemingly indestructible Living Metal, the Necrons have arisen from their aeons-long slumber to cleanse the Galaxy of all living things, in the service of their eldritch Gods. Wielding horrifying weaponry and gifted with arcane technologies, the Necrons seem to appear as if from nowhere, wreak devastation across entire worlds, and then disappear, as if they had never existed.

Type	Grit*	FV	SV	Speed	Notes
Necron Lord	2+/2+	+5	+5	+1	Leader. Terrifying [5pts].
Necron Immortal	3+/2+	+3	+4	+1	Terrifying [5pts].
Necron Pariah	3+/2+	+4	+3	+1	Terrifying [5pts]. Immune to Psyker powers [5pts].

Necron Flayed One	3+/2+	+4	+1	+0	Terrifying [5pts].

\* Necrons have a special rule relating to their Grit rolls. A Necron's Grit roll is normally 3+, but when rolling after being knocked down, their Grit roll is reduced to 2+. If a Necron fails this roll, then they "phase out" and are removed from the game.
